Website Portfolio

Created by Abs

Purpose

The purpose of this assessment was to create a portfolio website. My purpose for creating it was in order to be seen, be heard, innovate, build credibility and build a following.

How my Website portfolio works

https://absmohamed.github.io/My-Portfolio/

Conclusion

All in all, the website portfolio was successful although i faced a few challenges when creating the portfolio. The most difficult part for me was using flex for the topnav and grid for the container. My favourite parts of this website portfolio were:

- The early stages of creating the portfolio
- The end stage of the portfolio when it was working on three different types of devices.

Any Questions!
